APPENDIX A – Cover page template for Literature Review and Project dissertation

APPENDIX B – Declaration template

APPENDIX C – Checklist for Literature Review and Project Dissertation

Last update: 31 Oct 2016
I. GENERAL INFORMATION

1. Communication
Students are encouraged to actively contact their supervisors for advice throughout the course.

**Email is the major means of communication between the supervisor and students.** Update on time-table and notice will be sent by email. All students are requested to check their email on a **daily basis** and are expected to reply promptly to acknowledge receipt of email notice. **If there are any changes in the corresponding address, email or telephone numbers, students should immediately inform the administrative office in WRITING.**

From time to time, revisions to this handbook and other updates will be sent by Programme Secretariat via email.

2. Curriculum
The curriculum shall comprise an approved programme of study and practice in a field related to infectious diseases and clinical microbiology. It shall consist of (60 credits) of teaching units and prescribed work normally extending over 2 academic years of part-time study. This will comprise of:

a) **Lectures & Quizzes:** Six 2-day weekend courses (each of at least 10 hours)
   - **MICR6005 Infectious Diseases Updates I (3 credits)** = Infectious Disease Course 1 (12-13 Nov 2016) and Infectious Disease Course 2 (1-2 Apr 2017)
   - **MICR6006 Infectious Diseases Updates II (3 credits)** = Infectious Disease Course 3 (15-16 Jul 2017) and Infectious Disease Course 4 (Nov 2017, TBC)
   - **MICR6007 Infectious Diseases Updates III (3 credits)** = Infectious Disease Course 5 (Apr 2018, TBC) and Infectious Disease Course 6 (Jul 2018, TBC)

b) **Clinical attachment:**
   - **MICR6008 Infectious Diseases Clinical Attachment (15 credits)** =
     - 2 Bedside Infectious Diseases Consultations (exact time to be arranged with supervisor);
     - 1 Clinical Microbiology Laboratory Round (exact time to be arranged with supervisor);
     - 3 Infectious Diseases Rounds* & 2 presentations (1 case presentation + 1 project presentation).
c) **Project:**
   MICR6009 Infectious Diseases Research Project (18 credits)

d) **Literature review:**
   MICR6010 Infectious Diseases Literature Studies (Literature Review) (18 credits)

The curriculum shall include all examinations. To complete the curriculum a candidate shall a) follow instruction in the courses prescribed and complete satisfactorily all coursework requirements; and b) satisfy the examiners in all examinations as may be required.

3. **Format of continuous assessment**
   Performance of the diploma candidates in the quizzes, clinical attachment, literature review and project will be the basis of assessment.

4. **Quiz**
   There will be a total of 6 quizzes, each on the second day of each course (see table below). One mark would be awarded for each correct answer and no marks would be awarded or deducted for blank/wrong answers.

# Questions format: MCQ

5. **Clinical attachment**
   Candidates will be divided into groups of 2 to 4. Each candidate will spend 60 hours of clinical attachment within an assigned period of 3 months. The attachment would be in the format of the following 4 items.
a) Three Friday Infectious Diseases (ID) Rounds
   Each candidate has to attend 3 ID rounds (Friday morning 10 am to 12 noon, Room 405, Department of Microbiology, 4/F, Clinical Pathology Building, Queen Mary Hospital) in the assigned period of 3 months.
   (Link to map: http://www3.ha.org.hk/qmh/qmfloorplan.htm)

b) Presentations
   One case presentation and a presentation on the completed project are required. The presentations will be conducted during the Friday ID round. The project presentation should include the background, study objectives, methodology, results and discussion.

   Submission of PowerPoint files presented at Friday ID Rounds
   Soft copy of the presented PowerPoint files MUST be sent to course secretariat for record after your presentation.

c) Two Bedside Infectious Diseases (ID) Consultations
   Candidates are required to follow 2 sessions of ID consultations with his/her supervisor. The purpose is to learn the clinical format and skill in managing hospitalized patients with ID. The exact date of bedside consultations will be decided among the candidates and their supervisor.

d) One Clinical Microbiology Laboratory Rounds
   Each candidate has to attend 1 Clinical Microbiology Laboratory Round. It consists of laboratory tour and demonstration of some commonly used laboratory techniques. This is intended to provide the candidate with exposure to some common tests (e.g. Gram stain, bacterial cultures) conducted in the microbiology laboratory. Students should contact individual supervisors for arrangement of laboratory round in advance.

6. Project
   A clinical and/or laboratory surveillance project (at least 2000 words) should be conducted over a period of at least 3 months within the candidate's own hospital or practice so that the candidate can understand the skills of epidemiological surveys. The candidate is responsible for working out the exact topic and study population with his/her supervisor.

7. Literature review of important topics in ID
Each candidate is required to write a literature review on a topic concerning infectious diseases or clinical microbiology. The candidate has to perform a literature search and extensively review all the relevant medical publications and submit **ONE signed hard copy and one soft copy** of a comprehensive summary of **at least 1500 words** (word count does not include reference list) before the deadline. The document should be fully referenced according to the format of “uniform requirements for manuscripts submitted to biomedical journals.” **Candidates are reminded NOT to choose topics already covered in the course lectures for review.**

(*Submission of project dissertation and literature review to Course Secretariat*)

One signed hard copy of the project dissertation and a soft copy with other files in word and pdf formats (together with the checklist) **MUST be included in the submission.** (Appendix A, B and C)

Your submission of project dissertation will undergo plagiarism check. Please go to [http://www.rss.hku.hk/plagiarism/page2s.htm](http://www.rss.hku.hk/plagiarism/page2s.htm) for details. Official information about Turnitin in HKU could be found at [http://lib.hku.hk/turnitin/turnitin.html](http://lib.hku.hk/turnitin/turnitin.html)

---

8. Diploma candidates should refer to “The Graduate School Handbook” published by the Graduate School, The University of Hong Kong for other information, regulations, procedures not covered in this information handbook. (Available at [http://www.gradsch.hku.hk/gradsch/current-students](http://www.gradsch.hku.hk/gradsch/current-students))

9. Students are reminded to sign all course work and send the required hard and soft copies to the Course Secretariat either in person or by mail to Department of Microbiology, The University of Hong Kong, Room 423, University Pathology Building, Queen Mary Hospital Compound, Pokfulam Road, Hong Kong. Students should **NOT** send the course work directly to your supervisor. Submission of the titles for literature review and project (and the two-page project proposal) may be sent by fax at 2855-1241.
II. GUIDELINES FOR PREPARATION OF MANUSCRIPTS

1. Manuscripts here refer to Literature reviews and Project dissertation.

2. Each copy of a manuscript shall be typewritten or printed on one side only of A4 size paper (297mm × 210mm), with a margin of not less than 40 mm on the left-hand edge of each page.

3. Title page for Project Dissertation and Literature Review: Include the name of the course, title of the review or dissertation, your name in full, your University number, name of the supervisor(s) and date of submission (Appendix A).

4. Declaration page: include the following sentences, “I, (name of candidate), declare that this manuscript represents my own work and that it has not been submitted to this or other institutions in application for a degree, diploma or any other qualifications.” and “I, (name of candidate) also declare that I have read and understand the guideline on ‘What is plagiarism?’ published by The University of Hong Kong (available at http://www.hku.hk/plagiarism/) and that all parts of this work complies with the guideline.” The declaration should be dated and signed by the candidate (Appendix B).

5. Project dissertation. Divide the text into the following sessions including title page, statement of declaration, acknowledgement, abstract, background, methodology, results, discussion, references, tables and figures. Begin each of the sections on a new page.

6. Abstract for project dissertation: An abstract in English of not fewer than 200 and not more than 500 words shall be a part of each dissertation. Use a structured format for the abstract with the following headings: background, objective, method, results and conclusion. Include a word count of the abstract.

7. Text. Double-space everything, including the title page, abstract, tables, references, and figure legends. Type only on one side of the paper and number all pages, beginning with the title page. Indent paragraphs 5 spaces; leave no extra space between paragraphs. Allow one space before beginning the next sentence. Use Times New Roman font size 12 and justify both margins. Include a word count of the body text. For literature review, the body text (excluding references) should contain at least 1500 words. For project dissertation, the body text (excluding references) should contain at least 2000 words.

8. References. Follow the Uniform Requirements style. Place numbers in parentheses, not in superscripts. Number citations in order of appearance (including in text, figures, and tables). Consult List of Journals Indexed in Index Medicus for accepted journal abbreviations; if a journal is not listed, spell out the journal title in full. List the first six authors followed by “et al”.

9. Tables and figures. Figures, symbols, lettering, and numbering should be clearly legible. For figures, use color as needed.
10. **Templates** for the cover page and declaration page are available at the Centre of Infection website for download ([http://www.hkucoi.hku.hk](http://www.hkucoi.hku.hk)). These templates should be used in all the submitted manuscripts.

11. Additional and more detailed guidelines on the required format of the literature review and the project dissertation can be found at [http://www.hkucoi.hku.hk](http://www.hkucoi.hku.hk).

12. **Checklist.** Students are required to complete and submit a checklist together with their literature review and project dissertations (Appendix C).

13. **All assignments will be deemed as outstanding if the required format is not followed or that the student’ signature, declaration page and/or the checklist is/are not submitted.**
III. PROJECT PROPOSAL

The proposal should be about two pages in length and consist of the following sections (case series acceptable):

1. Title of project
2. Background
3. Objectives
   - e.g. To find out the prevalence of MRSA nasal carriage among patients admitted from nursing homes to a regional hospital
   - e.g. To describe the clinical features and outcome of 50 patients with acute pericarditis in a regional hospital from 1995–2000
4. Design
5. e.g. prospective or retrospective study; observational or interventional; case series
6. Setting
   - e.g. in-patients or out-patients, name of institute(s) for the proposed study
7. Duration of study
   - e.g. four years retrospective review from 1997–2000
8. Patients
   - e.g. number of subjects recruited
9. Measurements
   - e.g. demographic data, clinical features, microbiology results
IV. ASSESSMENT

Candidates will be assessed throughout the two academic years as set out below. Performance of the diploma candidates in the quizzes, clinical attachment, topic dissertations (literature review) and project will be the basis of assessment.

Distribution of marks

<table>
<thead>
<tr>
<th>Course code</th>
<th>Title</th>
<th>Proportion of overall marks</th>
</tr>
</thead>
<tbody>
<tr>
<td>MICR6005/MICR606/MICR6007</td>
<td>Lectures and quizzes</td>
<td>35%</td>
</tr>
<tr>
<td>MICR6008</td>
<td>Clinical attachment</td>
<td>35%</td>
</tr>
<tr>
<td>MICR6009</td>
<td>Project and project dissertation</td>
<td>15%</td>
</tr>
<tr>
<td>MICR6010</td>
<td>Topic dissertations (Literature review)</td>
<td>15%</td>
</tr>
</tbody>
</table>

Passing mark:
Candidates who have obtained an overall mark of 50 or above shall be given a “PASS”.

Remedial studies
Any candidate who has failed to complete the curriculum may be permitted by the Board of Examiners

To sit a supplementary examination; and/or

To repeat the clinical attachment; and/or

To re-submit the topical dissertation(s); and/or

To repeat and re-submit the project and project dissertation; and/or

To undertake the study of any alternative course or courses that enable completion of the curriculum.

All remedial work has to be completed within a specified period of not more than three months. Supplementary examination will take place at a specified date (normally in July or August of the same academic year) determined by the Board of Examiners.

Absence from an examination
Candidates who are unable through illness or other acceptable reasons to attend for examination may apply (in writing) for permission to attend for examination at some other time.

VIII. SELECTED LIST OF PAST PROJECT TITLES

1. Pelvic inflammatory diseases in a regional hospital in Hong Kong
2. The role of aspergillus in idiopathic hemoptysis
3. Does aging affect the clinical presentation of TB?
4. Study of virological role in 16 cases of toxic epidermal necrolysis and Stevens-Johnson syndrome admitted within 8 months in teaching hospital
5. Bacterial meningitis in Paediatrics in Tuen Mun Hospital July 1995 to June 2002
6. A descriptive review of the approach of management of suspected neurosyphilis in a regional hospital
7. Bacteriology in childhood urinary tract infection: a review in a regional hospital
8. Effect of alcohol-based handrubs on nosocomial pneumonia in an intensive care unit
9. Time series analysis of tuberculosis in Hong Kong
10. Phenotypic and genotypic characterization of Streptococcus bovis causing bacteremia
11. Retrospective review of respiratory virus infection in QMH Hong Kong 1998-2000
12. Retrospective review of meningitis in a regional hospital
13. An audit of antimicrobial prescription in a family clinic
14. Social factors predisposing outpatients to upper respiratory tract infections
15. Hospital and ICU admissions for cardiorespiratory conditions during influenza season - a descriptive study
16. A retrospective study for patients with Candidaemia in PYNEH in the year 2000-2002
17. Mantoux testing in young immunocompetent host
18. Toxigenic Clostridium difficile and intestinal acute graft versus host disease in allogenic stem cell transplantation: is there any association?
19. Infectious disease emergency in upper respiratory tract - a single center experience
20. 16s rRNA sequencing by Microseq 500.
22. Aeromonas Bacteremia in Hong Kong
23. Acute Exacerbations of chronic obstructive pulmonary disease: pathogens, initial antibiotic usage and short term outcomes
24. Infective complications of primary prophylactic interleukin - 2 receptors antagonists in renal transplantation: result from a single centre experience
25. "Streptococcus milleri" endocarditis caused by Streptococcus anginosus in TMH & QMH
26. Body temperature Measurements in Children 0-6 years of Age
27. Antibiotic prescription pattern in a private practice clinic
28. Neonatal blood-stream infection in a regional hospital in Hong Kong: a four years retrospective study from 1999-2002
29. The role of absolute lymphocyte count in the Early Management of fever patients with suspected SARS in emergency department
30. The use of over-the-counter-antibiotic in a private clinic
31. Over-the-counter Acquisition of Antibiotics in HK: A Questionnaire Survey
32. The real life antibiotic prescribing pattern in a hypothetical patient with URTI symptoms among the general practitioners working in Hong Kong
33. Plesiomonas bacteremia in Hong Kong
34. A prospective randomized trial of meropenem versus imipenem/cilastatin as monotherapy for neutropenic fever during early phase post stem cell transplantation
35. Surveillance of central venous catheter related sepsis in an intensive care unit
36. The efficacy of one-day cefazolin versus extended course of Rocephin and Unasyn for neurosurgical patients with extraventricular drainage device (EVD) as prophylactic antibiotic cover in the prevention for EVD related ventriculitis
37. Nosocomial infections in seven subacute and chronic hospitals in Hong Kong
38. Retrospective analysis of the incidence and risk factors of sexually transmitted diseases in general practice 2000-2003
39. Comparison of accuracy, validity and equivalency of infrared temporal artery thermometer and infrared tympanic thermometer with mercury thermometer in two G.P. clinics in HK
40. The use of antibiotics with acute diarrhea in clinic settings. Prescribing practices, patient expectations, and patient satisfaction
41. Hygiene of water and food supplied by air caterers in Hong Kong in 2003
42. Comparison of risk factors associated with methicillin-resistant and methicillin-susceptible Staphylococcus aureus bacteremia: a retrospective review of a regional hospital in Hong Kong
43. Side effects of Mefloquine as antiviral prophylaxis by Travel Health Centre
44. A medical audit of neutropenic fever in Department of Clinical Oncology, PYNEH; a retrospective study
45. A study of three different Mycobacterial Polymerase Chain Reaction (PCR) methods carried out in Hong Kong Sanatorium and Hospital between June 02 and March 04
46. Lower respiratory tract infections in infants and children 6 years and younger treated in a regional hospital over a year period in HK
47. Implementing clinical guideline of appropriate antibiotics use for treatment of acute respiratory tract infections in adults: a follow up telephone survey of clinical outcomes and patient response
48. The role of lopinavir/ritonavir in the treatment of SARS: initial virological and clinical findings
49. An audit of microbiological tests in a primary care clinic
50. Prevalence of infections in residential care homes (RCHEs) for the elderly in Hong Kong
51. The usefulness of Procalcitonin as a marker of bacterial infection in the clinical setting: A retrospective review of patients with prolonged fever or leucocytosis in a public hospital
52. Influence of vancomycin MIC on the treatment of methicillin-resistant Staphylococcus aureus bloodstream infection
53. Retrospective review of typhoid and paratyphoid fever in a regional hospital
54. Use of fibreoptic bronchoscopy in diagnosing sputum smear-negative pulmonary tuberculosis
55. Retrospective analysis of (1 --> 3)-ß-D-glucan assay in the diagnosis of invasive fungal infection
56. Pattern of infections and anti-microbial use in systemic lupus erythematosus patients admitted to intensive care unit
57. Streptococcus bovis infection in infants and young children in a regional hospital in Hong Kong
58. Serum C-Reactive Protein Levels and White Cell Count as markers of Bacterial Infection in Elderly

59. Group B streptococcal infection in non-pregnant adults

60. Retrospective analysis of the effect of non-tuberculous mycobacterial infection in patients with bronchiectasis

61. Microbiological pattern in lung cancer patients admitted to a local acute hospital for pneumonia

62. A retrospective review of bacteroides infection in Hong Kong

63. Gastrointestinal muromycosis: a case series

64. Review of CMV Disease in Immunocompetent Patients in a Regional Hospital

65. Factors associated with Positive Blood Culture

66. Infection in lung transplant recipients – A local perspective

67. A Retrospective Review of Diagnosis of Pulmonary Tuberculosis in A Regional Chest Hospital

68. Twelve-year experience with necrotizing fasciitis in the intensive care unit of a local regional hospital

69. A review on the quality of infectious diseases and microbiology pharmaceutical advertisements in Medical Journals in Hong Kong
